DETAILED ACTION

Claims 1-13 and 15-25 are cancelled, claims 14 and 26-30 are pending and have been examined on the merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicants amendments and remarks filed, May 19, 2005 have been considered and are persuasive. Rejections and objections not specifically addressed are withdrawn.

Claims 14 and 26 stood provisionally rejected under obviousness-type double patenting with copending Application 10/613,754. Upon consideration of Applicant's remarks, and amendments to claims in the copending application, the obviousness-type double patenting rejection is withdrawn in favor of the rejection set forth below.

Claims 14 and 26-30 have been examined on the merits.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 14 and 26-30 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 73-78 (found in the Examiner's Amendment/Notice of Allowance) of copending Application No. 10/613,754 (US PGPUB 20040171541 A1). This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 1654

The claims are both instantly drawn to modulating the activity of EPO-R with compounds of formulae (1)-(4), and the species of instant claim 26 and are coextensive in scope of both the products and methods, that is the claims are drawn to identical subject matter.

Conclusion

Applicant's actions, i.e.- amendments to the claims of copending application 10/613,754 to be of commensurate scope (statutory double patenting), necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
